

Quiz App

Question two

Assignment Proof of Concept

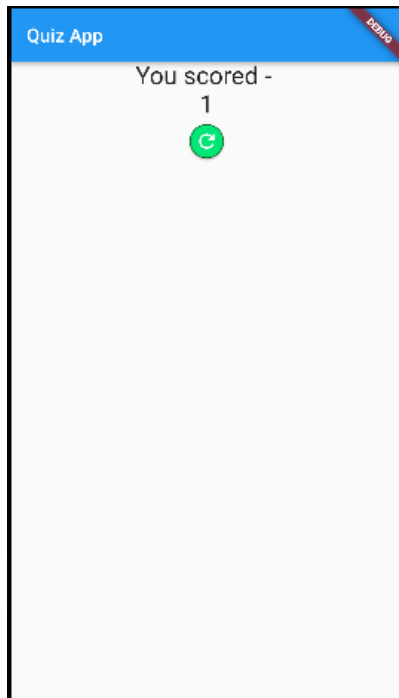

For the proof of concept I have created a demo of the mobile application that is to be created. The following are the screenshots of the assignment. For the project source code you can use the link -

https://drive.google.com/drive/folders/1WbV0UgJSRiFmQOwRwU1xH3O4p9KxL_1r?usp=sharing

Questions

As you can see here, I have two questions. There is only one correct option for each question. Once the user clicks on any the user can see the next question. Once the user has answered all the questions then they will be taken to the result screen.

Result

As you can see here, I have displayed the score of the user (out of 2 in this case) along with a retry button that allows the user to retake the quiz.
