

Software Lab - IV

Assignment - 2

Task

Task is to create a quiz app such that:

1. There are 10 MCQ questions where users can only see one question at a time. Display the next question once the user answers the current question.
2. Once the user has answered all the questions, display the score (i.e. number of questions answered correctly) along with an option to retake the quiz.
3. The questions can be kept in a .json file or as a constant variable.
