

Assignment-2

The XML document is provided containing information of employees of a business organization. It should include details like First-Name, Last-Name, Phone, Birthday and Hourly rate of the manager the employee works. You should represent these fields for at least 8 employees.

Add XSL/CSS styling to it, to make it look like the image given below.

Employees List

Last Name	First Name	Phone Number	Birthday	HourlyRate
Smith	John	1-800-123-4567	1960-05-25	35.85
Jones	Jane	1-800-999-9999	1980-11-01	58.17

Now add a new attribute as id which is unique to every employee.

After that create a dtd file which will have following grammar rules:

- Employee ID should be an attribute not as a child and it must be compulsory to have employee ID if it is not mentioned it should show error after validation.
- Rest all tags must be child tags of Employee and Root tag must have name as Employees.
- First Name, phone number birthday and hourly rate are necessary if it is not mentioned it should show error after validation.

Submit your XML, XSL and DTD file.
